Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 4-6, 19-22, 25, and 27 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Pat. No. 4,504,991 to Klancnik.

Claim 1, Klancnik discloses an open flame resistant mattress comprising a fire barrier fabric at least partially enclosing a core 75 of said mattress, said fire barrier fabric comprising a fire barrier layer 22 of neoprene foam and backing 24 of fiberglass and a thermally insulating layer 26. With regards to the fire barrier layer and thermally insulating layer independently comprising at least one char-forming flame-retardant fiber, Applicant discloses in the specification that fiberglass is a char forming flame resistant material. Therefore, combo-layer 22/24 meets the limitations of char-forming flame retardant fiber.

Claim 4, Klancnik discloses a method for reducing flammability of an article comprising filling materials, said method comprising at least partially enclosing the filling materials with a fire barrier fabric comprising a fire barrier layer 22 of neoprene foam and backing 24 of fiberglass and a thermally insulating layer 26. With regards to the fire barrier layer and thermally insulating layer independently comprising at least one charforming flame-retardant fiber, Applicant discloses in the specification that fiberglass is a

char forming flame resistant material. Therefore, combo-layer 22/24 meets the limitations of char-forming flame retardant fiber.

Claims 5-6, wherein said article is a mattress.

Claim 19, Klancnik discloses a flame-retardant composite fire barrier fabric comprising a thermally insulating layer 26 and a fire barrier layer 22 of neoprene foam and backing 24 of fiberglass. With regards to the fire barrier layer and thermally insulating layer independently comprising at least one char-forming flame-retardant fiber, Applicant discloses in the specification that fiberglass is a char forming flame resistant material. Therefore, combo-layer 22/24 meets the limitations of char-forming flame retardant fiber.

Claim 20, wherein at least one of said fire barrier layer and said thermally insulating layer comprises at least one structure providing char-forming flame-retardant fiber.

Claims 21-22 and 25, wherein said at least one flame-retardant fiber is fiberglass.

Claim 27, wherein the fire barrier fabric at least partially encloses the filling materials (fig. 4).

Application/Control Number: 10/661,292

Art Unit: 3673

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 2, 7, 23-24, and 26 are rejected under 35 U.S.C. 103(a) as being unpatentable over U.S. Pat. No. 4,504,991 to Klancnik in view of U.S. Pat. No. 6,410,140 to Land et al.

Regarding claims 2 and 7, Klancnik discloses all of the Applicant's claimed limitations except for the mattress resisting an open flame under conditions of a full-scale open flame test. Land discloses a material fabricated for a mattress to resist an open flame under conditions of a full-scall open flame test (col. 7-8 lines 65-68 & 1-16). It would have been obvious to one having ordinary skill in the art at the time of the invention to employ the material as taught by Land with the mattress of Klancnick in order to provide a fire resistant fabric having a feel and surface characteristic of upholstered fabrics.

Claim 23-24 and 26, Klancnik discloses all of the Applicant's claimed limitations except for the at least one flame-retardant fiber comprising para-aramid fibers and a blend of flame-retardant viscose and modacrylic fibers. Land discloses one flame-retardant fiber comprising para-aramid fibers (col. 4 lines 46-47)(col. 5 lines 24-35). It would have been obvious to one having ordinary skill in the art at the time of the invention to employ the material as taught by Land with the mattress of Klancnick in

order to provide a fire resistant fabric having a feel and surface characteristic of upholstered fabrics.

Allowable Subject Matter

Claims 3 and 28 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Fredrick C Conley whose telephone number is 308-7468. The examiner can normally be reached on m-th m-fri.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Heather Shackelford can be reached on 308-2978. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
